

Horserail®

The Original Horserail® Fencing System.

HORSERAIL HOTTOP PLUS® & HOTCOTE®

Horserail® fencing is the most trusted flexible rail by equine property owners globally.

Horserail® is made from a 4-inch wide, long-life UV stabilised non-conductive medium density polyethylene. It mimics the appearance of a traditional timber rail from a distance and features three molecularly bonded high-tensile wires running through it.

Designed and made in the US, the original Horserail® has over 30 years of proven performance, even in tough Australian weather, making it one of the safest and most reliable options for equine properties.

- 3 x high tensile wires trapped within the rail.
- Long-life UV stabilized, non-conductive, medium density polyethylene
- Highly conductive carbon compound
- Molecularly bonded to the wire
- Available in black, white or brown colours

Trusted all over the world for over 30 years.

Client testimonial

“We are extremely happy with the Horserail® products we have used on our 120 acre property Pinker Park. Apart from looking very professional and smart we have very minimal maintenance and it is so safe for the horses the way it is designed. We would recommend it 110% to anyone looking to set up any kind of equine property.”

Simon Hunter
Farm Manager – Pinker Park, Euroa, Victoria

Horserail Hottop Plus[®] is the everything and all of electric horse fencing — incorporating safety, longevity and cost-effectiveness. Proven in Australia for 30+ years!

Horserail Hottop Plus[®] is a flexible electric rail that has both top and bottom wires electrifiable. It's built from medium density polyethylene and three high tensile wires which are molecularly bonded, to provide a strong, unbreakable and splinter-free fence. Horserail Hottop Plus[®] is made in the USA for Australian conditions.

PLEASE NOTE: If using Hottop Plus[®] as your bottom rail – pay special attention to the distance from the ground to the bottom side of rail – and make sure to keep the area under the fence free of tall grass and any debris that may cause the electricity to short out.

- 3 x high tensile wires trapped within the rail.
- Long-life UV stabilized, non-conductive, medium density polyethylene
- Highly conductive carbon compound
- Molecularly bonded to the wire
- Available in black, white or brown colours

Horserail Hottop Plus[®] 200m is for those who want the finest electric horse fencing system.

Horserail Hottop Plus[®] 200m roll - 4" - Electric Rail - Black

CODE: HBHT4TS
SUITABLE FOR: Hottop® and Hottop Plus® Rail
SIZE: 14cm x 9cm x 9cm
PACK QUANTITY: Box of 25
WEIGHT: 0.70kg
ADDITIONAL DETAILS: Can be placed anywhere on the rail, at any time, by first holding it up to the rail and then sliding the removable section into the appropriate slot. Tighten and set locking pins.

Horserail Hotcote® products are designed to create highly effective electrifiable horse fencing.

Hotcote® provides an electric shock by using high-tensile wire coated in a highly conductive carbon compound. The product can be used alone as a fence or along with Horsecote® and/or Horserail® to create the look you desire. With patented installation hardware, the coated wire is attached, joined, and tensioned in a clean, neat manner while remaining safe for both horse and rider. A properly installed fence with no exposed wires can be achieved without stripping, crimping, or notching.

- Steel is hot-dipped galvanised, with a powder coated finish
- Heavy duty steel
- Easy to use
- Safer for horses and riders
- Available in black, white or brown colours

Horserail Hotcote® 45° Attaching Buckle - Electric - Insulated Steel - Black

CODE: HBHTC45AB
SUITABLE FOR: Hotcote®
SIZE: 15cm x 11cm x 6cm
PACK QUANTITY: Box of 25
WEIGHT: 0.40kg
ADDITIONAL DETAILS: Attaching end is set on 45° angle. Ideal for attaching to round posts.

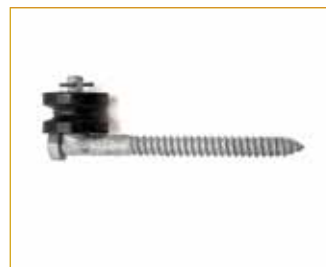

Horserail Hotcote® Donut Tensioner - Black

CODE: HBHCD
SUITABLE FOR: Hotcote®
SIZE: 8cm x 8cm x 5cm
PACK QUANTITY: Box size 12
WEIGHT: 0.40kg
ADDITIONAL DETAILS: No stripping or crimping needed. Comes with 2 Stainless Steel Locking Pins.

Horserail Hotcote® Straight Attaching Buckle - Electric - Insulated Steel - Black

CODE: HBHTCSAB
SUITABLE FOR: Hotcote®
SIZE: 14cm x 7cm x 3cm
PACK QUANTITY: Box size 25
WEIGHT: 0.20kg
ADDITIONAL DETAILS: Ideal for attaching to square timber or steel posts.

Horserail Hotcote® Inside Corner Roller - 4" - Black

CODE: HHICR4
SUITABLE FOR: Hotcote®
SIZE: 16cm x 4cm x 6cm
PACK QUANTITY: Box size 12
WEIGHT: 0.15kg
ADDITIONAL DETAILS: Insulated coach screw with roller attached. Allows the coated wire to run continuously around bends more than 45°.

Horserail Hotcote® Joining Buckle - Steel - Black

CODE: HBHCJB
SUITABLE FOR: Hotcote®
SIZE: 10cm x 2cm x 2cm
PACK QUANTITY: Box of 10
WEIGHT: 0.06kg
ADDITIONAL DETAILS: A quick, secure method to join coated wires without stripping or crimping. Used for joining two ends of Hotcote® together.

Standard Hotcote® Line Insulator - Black

CODE: I28LB
SUITABLE FOR: Hotcote®
SIZE: 7cm x 5cm x 3cm
PACK QUANTITY: Box of 30

ADDITIONAL DETAILS: No sharp edges or moving parts, saves time and aggravation, weather resistant and UV stabilized & very strong.

Our new Hotcote® Insulator is unlike any other fencing insulator on the market.

Horserail® has developed a world-class design innovation for permanent installation of electrifiable coated wire fencing. The Hotcote® Insulator is an extremely durable wire mount that is made of high quality plastic and allows easy installation of coated wire while insulating it from the posts. Developed from a customer request, the Hotcote® Insulator was made to compliment the quality of Horserail® coated wire and accessories.

Horserail® and Hotcote® Accessories

Each piece of this horse fencing system is designed to be easily installed using a patented procedure for attaching, joining and tensioning. It lets you create a long lasting and attractive fence that requires little maintenance.

Our Horserail® brackets are insulated, double coated for superior weather resistance, hot-dipped galvanised, with a powder coated finish and are easy to use.

Horserail® Fixed Insulated 'T' Buckle - 4" - Steel - Black

CODE: HBHT4FT
DESCRIPTION: Allows for a 'T' Junction off an existing fence line. Used on 2nd, 3rd & 4th rails.
SUITABLE FOR: Hottop® and Hottop Plus®
SIZE: 16cm x 7cm x 8cm
