

Legacy Rail – CLASSIC

PRODUCTS & ACCESSORIES

*110mm — Impact resistant, flexible fencing.
Classic board fencing, superior horse safety.
Limited 30 Year Warranty.*

- **Safer** — Legacy flexible rail absorbs impact, reducing the risk of serious horse injuries.
- **High Quality** — Legacy Fence material is a blend of impact modifiers, UV stabilisers and anti-fungicides. This specialised formulation provides added durability, as well as stain and mildew resistance.
- **Low Maintenance** — Will not splinter, rot, rust or crack. Minimal upkeep is required throughout the life of your fence. Simply adjust tension when needed.
- **Stronger** — Each rail has up to 1900kg's of break strength. This helps provide sound perimeter protection against possible fallen trees and roadside damage.
- **Climate Tough** — Withstands temperature conditions from -40°C to 93°C without becoming brittle or experiencing breakdown.
- **Fast Installation** — Legacy rail installs in a continuous length and does not need paint. Simply unroll, attach and adjust tension.

DESCRIPTION: Legacy End Tensioner Kit – White – 110mm
SIZE: 110mm
COLOUR: White

Legacy Classic Rail Accessories, superior horse safety.

Our engineers have designed, as well as field tested, all the Legacy Fence hardware we supply. Each piece is first hot-dip galvanized then powder coated to ensure it will hold up for the lifespan of your fence. Brackets allow the fence to flex on impact and can be determined for 2.4m, 3.0m or 3.6m post spacing.

- End Tighteners are unique to Stock and Noble Legacy Rail. They allow one person to tighten the fence run. One end tightener, along with one end plate, is needed for a 201m straight stretch of rail. End tighteners can also be used at the start of your fence and at the end of your fence (depending on layout).
 - Line brackets are securely fastened to the post with tech screws.
 - Splice Plates seamlessly joins two rails.
 - End Plates cleanly terminate the rail opposite of an end tightener on 201m stretches of fence or less. (End tighteners can also be used on both ends depending on layout).
 - **Legacy Fence hardware makes tensioning your fence easier. A possible one-person installation. Special brackets are necessary for inside corners, round pens, or sweeping corners when the rail is placed on the inside of your posts.**
- Our knowledgeable staff will be happy to explain how to install any special brackets and lag bolts.*
