

Legacy Rail – BOLD

PRODUCTS & ACCESSORIES

135mm — *Impact resistant, flexible fencing.*

- **Safer** — Legacy flexible rail absorbs impact, reducing the risk of serious horse injuries.
- **High Quality** — Legacy Fence material is a blend of impact modifiers, UV stabilisers and anti-fungicides. This specialised formulation provides added durability, as well as stain and mildew resistance.
- **Low Maintenance** — Will not splinter, rot, rust or crack. Minimal upkeep is required throughout the life of your fence. Simply adjust tension when needed.
- **Stronger** — Each rail has up to 1900kg's of break strength. This helps provide sound perimeter protection against possible fallen trees and roadside damage.
- **Climate Tough** — Withstands temperature conditions from -40°C to 93°C without becoming brittle or experiencing breakdown.
- **Fast Installation** — Legacy rail installs in a continuous length and does not need paint. Simply unroll, attach and adjust tension.

*Classic board fencing, superior horse safety.
Limited Lifetime Warranty.*

Bold board fencing, superior horse safety.

Legacy Bold is our premium and most asked for rail that closely resembles traditional board fence. It carries a Limited Lifetime Manufacturing Warranty, that is transferable one time. No other fencing on the market today offers this benefit!

DESCRIPTION: Legacy Bold Rail – Black – 201m Roll
SIZE: 135mm x 201m
COLOUR: Black
WEIGHT: 69kg
LIMITED WARRANTY: Lifetime

CODE: LR5201NL
DESCRIPTION: Legacy Bold Rail – Natural – 201m Roll
SIZE: 135mm x 201m
COLOUR: Natural
WEIGHT: 69kg
LIMITED WARRANTY: Lifetime

CODE: LR5201WT
DESCRIPTION: Legacy Bold Rail – White – 201m Roll
SIZE: 135mm x 201m
COLOUR: White
WEIGHT: 69kg
LIMITED WARRANTY: Lifetime

CODE: 5LBK
DESCRIPTION: Legacy Line Bracket – Black – 135mm
SIZE: 135mm
COLOUR: Black

Client testimonial

“Thank you so much for making a fence that withstood the storm and the trees that fell on it. My Legacy Rail fencing held the trees and snapped back into place when I was able to get the trees cut. I am telling everyone about it — words cannot express the money I have saved with having installed your fencing.”

Legacy Rail has also survived some of the greatest storms and severe weather. Trees have fallen on this fence, putting more pressure on the rail than any farm animal would. The rail will flex 150mm-200mm on impact. In most cases, the trees were cut off the fence and the rails have sprung back. With superior break strength and flexibility, the force of an impact radiates down the entire line of fencing dissipating that force. No traditional wood fence can offer you that kind of strength or forgiveness.

Use in combination with our other rails to create a custom fence made for your particular horses. The rails are also saturated with UV inhibitors and anti-fungicides.

CODE: L5ETKBK
DESCRIPTION: Legacy End Tensioner Kit – Black – 135mm
SIZE: 135mm
COLOUR: Black

CODE: L5EPBK
DESCRIPTION: Legacy End Plate Kit – Black – 135mm

DESCRIPTION: Legacy Splice Plate Kit – White – 135mm
SIZE: 135mm
COLOUR: White

NOTE: Unroll fencing rather than pulling from the center. Folding the rail flat onto itself will create a weak spot when tension is pulled. Be sure to keep a curve in the fence rail when folding. Our warranty is against any manufacturer's defect or weathering, not improper installation that causes failure.

Legacy Bold Rail Accessories, superior horse safety.

Our engineers have designed, as well as field tested, all the Legacy Fence hardware we supply. Each piece is first hot-dip galvanized then powder coated to ensure it will hold up for the lifespan of your fence. Brackets allow the fence to flex on impact and can be determined for 2.4m, 3.0m or 3.6m post spacing.

- End Tighteners are unique to Stock and Noble Legacy Rail. They allow one person to tighten the fence run. One end tightener, along with one end plate, is needed for a 201m straight stretch of rail. End tighteners can also be used at the start of your fence and at the end of your fence (depending on layout).
 - Line brackets are securely fastened to the post with tech screws.
 - Splice Plates seamlessly joins two rails.
 - End Plates cleanly terminate the rail opposite of an end tightener on 201m stretches of fence or less. (End tighteners can also be used on both ends depending on layout).
 - **Legacy Fence hardware makes tensioning your fence easier. A possible one-person installation. Special brackets are necessary for inside corners, round pens, or sweeping corners when the rail is placed on the inside of your posts.**
- Our knowledgeable staff will be happy to explain how to install any special brackets and lag bolts.**

Your lifetime fencing partner.
 With you, every step.
