

PRODUCTS & ACCESSORIES

Designed specifically with longevity in mind.

- Very strong — too hard for horses to chew and destroy
- Naturally insulated for electric fencing
- Low maintenance and do not require painting
- Can be drilled, screwed, and cut like a timber post
- Light-weight for easier installation
- Easy on the planet — made from 100% recycled plastic
- Maximum longevity — outlasts all other fencing material types
- Custom lengths available upon request for bulk quantities
- White available upon request
- Includes cap

Hogan Fence posts are available in:

2.1m or 2.4m high with 120mm Diameter. Custom lengths are available with bulk quantities.

Explore Hogan fence products.

Designed and manufactured in Australia, the Hogan posts offer a surprising package of benefits to most people wanting to build a great fence! These new generation posts include maximum stiffening to minimise movement in the sun and maximum 'ramability' for efficient installation. Designed specifically with longevity in mind, the stiffened 100% recycled plastic posts do not rust, do not erode from termites and ultimately outlast all other fencing material types.

A solid fence starts with a solid end assembly and corner assemblies - made from galvanised steel posts and horizontal rails for rigidity and solidarity. The Stock & Noble end assemblies are essential for a solid fence. Welding or easy fix connections are options during installation. Also, it is recommended the end assemblies are painted to match the colour of your fence - this will reduce horse injuries by having one colour of fence.

Hogan Fence Post — 2.1m height

CODE: FP1221
DESCRIPTION: Black Plastic Post – 210cm x 12cm – Round Inc Cap
SIZE: 210cm x 12cm x 4mm wall thickness
COLOUR: Black or white available
